SUMMARY

Manufacturing operations leader and U.S. Army veteran transitioning into software engineering. Currently building production automation tools using AI-assisted development at Tesla while pursuing a B.S. in Software Engineering at WGU. Recognized by Tesla's Manufacturing Agentic AI team as the highest Claude Code user in manufacturing operations. Proven ability to identify operational problems, build technical solutions, and ship them into real production environments.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML, CSS, Bash Tools: Git, GitHub, VS Code, Claude Code, Grok CLI, Cursor, MCP Concepts: REST APIs, JSON, Automation, Version Control, Agile fundamentals Platforms: macOS, Windows, Terminal/CLI

PROJECTS

GA3 Manufacturing Automation Suite — Tesla Fremont (May 2026–Present)

- Built 8 automated skills running on scheduled loops to surface real-time factory production data: daily digest, midshift monitor, alert checker, upstream watch, end-of-shift brief, and weekly scorecard
- Integrated approved internal data sources to automate operational reporting and shift visibility
- Selected by Tesla's Manufacturing Agentic AI team to provide comparative evaluation of AI tools for factory workflows

GA3 Manager Hub — Tesla Fremont (May 2026–Present)

- Building a local single-pane-of-glass dashboard centralizing production, quality, attendance, safety, and team data — replacing manual tab switching across multiple internal systems
- 9-page dashboard prototype built using HTML, CSS, JavaScript with structured JSON data pipeline via Grok CLI
- Serves as proof of concept for a formal AI tooling evaluation with Tesla's Agentic AI team

Personal Portfolio Website — mmira11.github.io (May 2026)

- Designed and built a responsive portfolio site from scratch using HTML, CSS, and JavaScript
 - Implemented scroll animations, typing effects, and mobile-responsive layout
 - Deployed via GitHub Pages with full Git version control workflow
-

EDUCATION

Western Governors University — B.S. Software Engineering (In Progress, Est. Dec 2027)
Completed: Introduction to Python, Web Dev Foundations, Front-End Web Dev, Version Control, IT Leadership, Natural Science Lab

PROFESSIONAL EXPERIENCE

Tesla, Inc. — Fremont, CA Associate Manager | *August 2020 – Present*

- Manage safety, quality, rate, and cost (SPQRC) performance for GA3 B-Shift Trim and Final production lines with 8 direct-report supervisors
- Built and deployed production automation tools using AI-assisted development, recognized as highest Claude Code user across Tesla manufacturing operations
- Led successful D50 launch in partnership with Process and Engineering teams; contributed to record quality month with 1MIS at 4.2%, FQT GA 80%, and Forensics 96%
- Played key role in Robo Taxi launch, managing south lot operations and transfer of 223 vehicles

Production Supervisor | *April 2018 – August 2020*

- Supervised daily shift operations in high-volume manufacturing, meeting safety, quality, and efficiency targets
- Maintained SOPs, inventory accuracy, and shift-to-shift knowledge transfer during production ramps

United States Army | **August 2008 – August 2018**

- Led teams across multiple combat deployments; Guantanamo Bay (1 year), Korea
 - Military Police qualified; held Secret Security Clearance
 - Managed equipment accountability and operational readiness under high-pressure environments
-

CERTIFICATIONS & TRAINING

- Lean Manufacturing & 4M Investigations
- KPI Metrics Analysis & Data-Driven Problem Solving
- U.S. Army Basic & Advanced Leadership Courses
- First Aid / CPR Certified
- Secret Security Clearance (inactive)
- Bilingual: English (Fluent), Spanish (Intermediate)
